CLASSIC

CLASSIC retractable awning an awning classic...

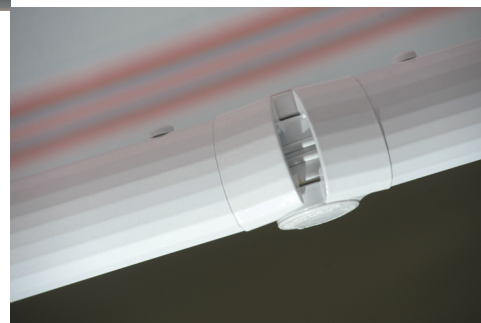

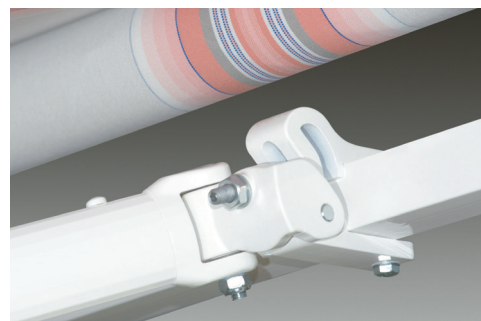

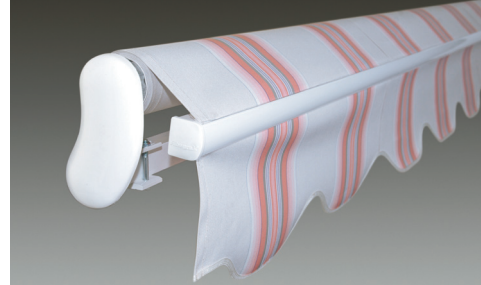

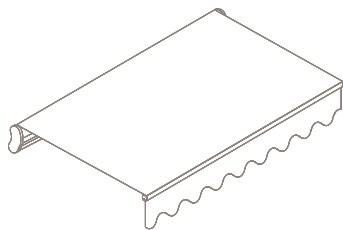

The Classic model is the most economic of our awning models. This is the retractable model with extension in one direction. It can be mounted on wall and ceiling.

With the aluminum top cover, which can be optionally applied, the protection of the awning mechanism and fabric from external effects is provided with low cost.

As in all our awning models, if desired the remote control or sun and wind sensors are applicable in this model too.

CLASSIC

SMART

SMART retractable awning very smart...

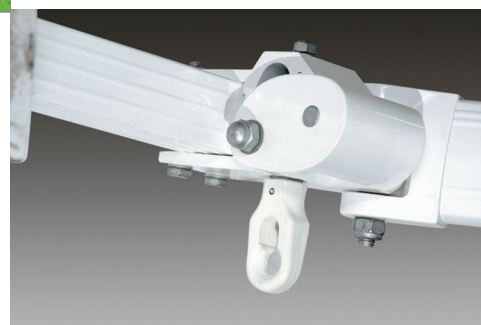

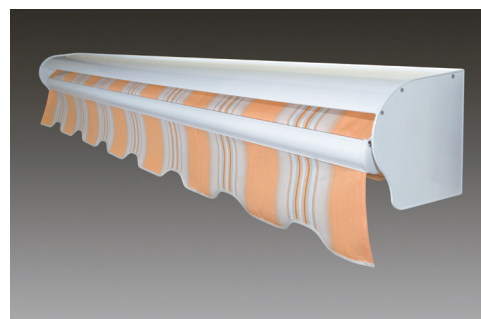

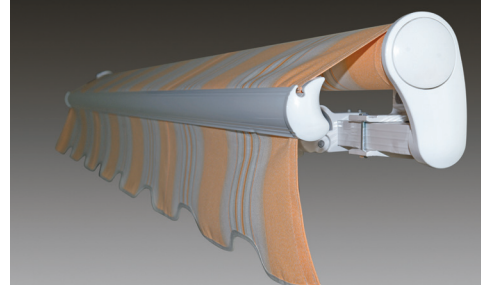

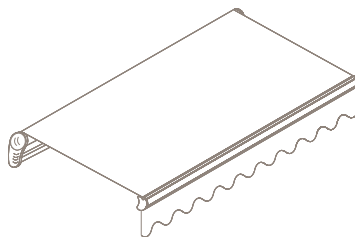

Meet with the most competent member of the retractable awning class.

Smart can be with the slope adjustment system as optional. Due to this system, the end users can easily alter the slope of the awning with only turning the crank rod without any service by sellers. To provide continuous shade for the seated area according to the movement of the sun from east to west, it is enough to just change the slope of the awning. The rain water gutter on the front bar of the awning prevents the water from running down the gutters. With Shadeplus system, the valances can move 200 cm up-down. So the horizontal sun rays can be prevented to get inside.

AURA

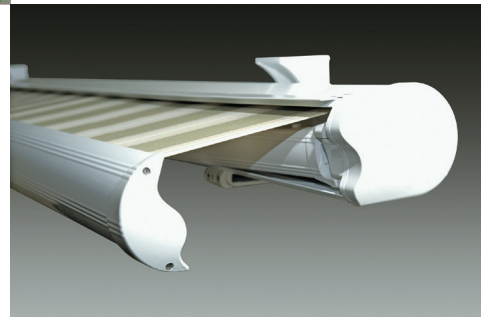

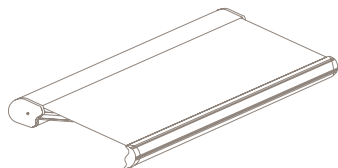

AURA cassette awning
small but so durable...

Aura is the smallest cassette model with its 13 x 22 cm dimensions in our cassette awning range while it's durable to the heavy duties against the negative effects of natural conditions. Aura cassette awning provides maximum protection thanks to its compact and modern cassette design. With small dimensions, an especially harmonic and unobtrusive integration of the awning to the facade is achieved as it adds aesthetic to the both commercial and private places with its dynamic construction.

features

ELEGANCE

ELEGANCE cassette awning
beyond shade...

Elegance cassette awning with its stylish design has been developed to decorate the facades of the buildings. Due to its compact cassette system, it fully protects the fabric and its working mechanism from external effects.

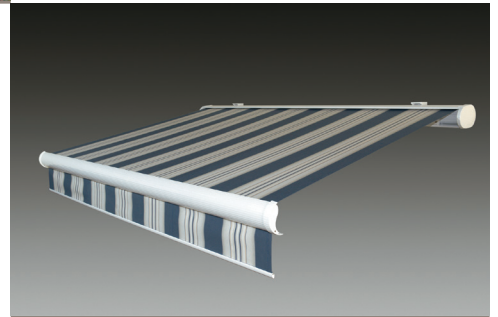

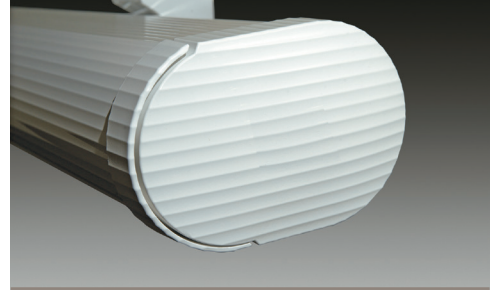

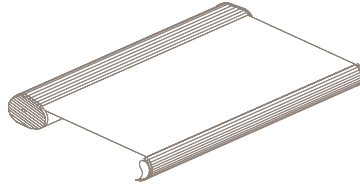

Elegance doesn't make any noise in the windy weather when it is at full closed position. So the awning is well-kept during particularly in winter.

Waved style valance or valance integrated with straight weight bar are applicable to the front bar of awning.

ELITE

ELITE cassette awning more shade...

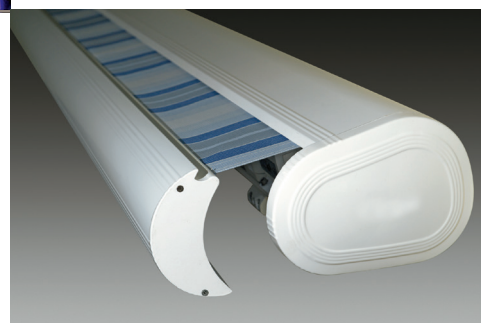

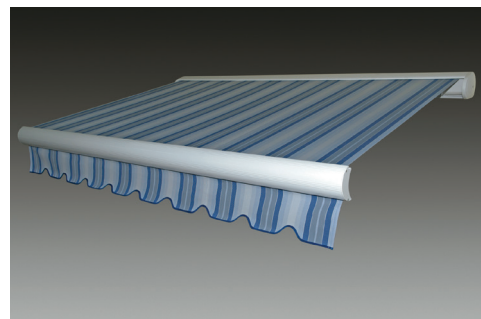

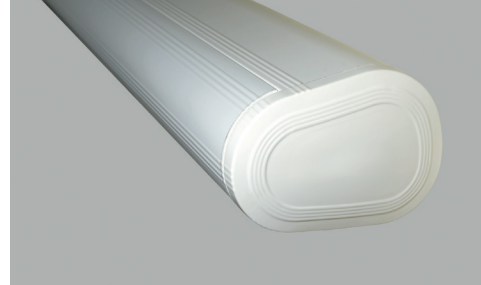

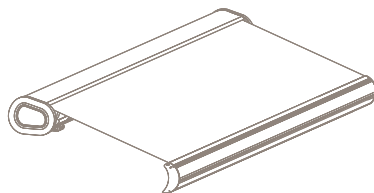

With its extension capacity of 400 cm, Elite cassette awning is ideal for those who are looking for more shade.

The cassette system is larger and more resistant, protects the awning fabric and working mechanism from the negative effects of natural conditions. Elite cassette awning can be operated only with a remote control. Of course with smart sun and wind sensors, the awning can be automatically opened and closed according to the sunshine and weather conditions.

SANTANA

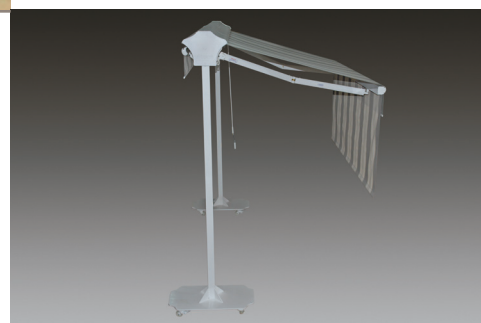

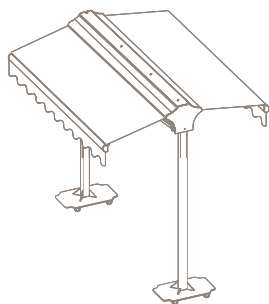

SANTANA double side retractable awning like a bridge...

Santana model system are produced from Elegance, Elite, Deluxe, Smart and Classic awning models. There are 2 separate awnings that work on Santana; so these awnings are operated as independent. The legs of construction may be fixed on the floor or wheeled. The double side hood frame is put on the top of Santana to prevent the water to flow between 2 awnings and to protect the awnings. With Shadeplus system, the valances can move 200 cm up-down. So the horizontal sun rays can be prevented to get inside.

WINTENT

WINTENT drop-arm
cassette awning
shade instead of darkness...

Delicate and practical solution
to protect houses, villas,
stores, shops from harmful rays
of the sun.

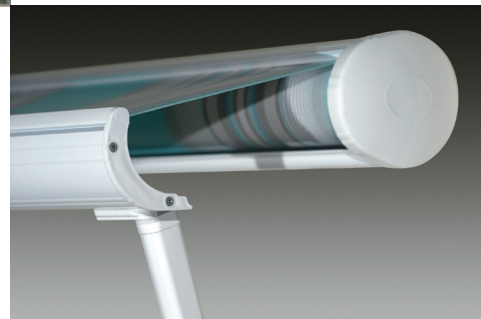

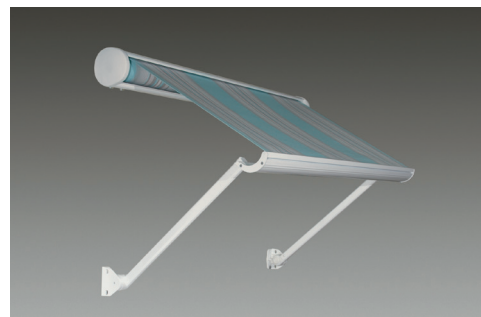

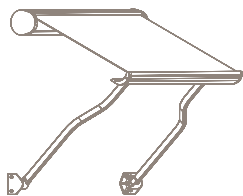

The slope of WINTENT can be
from 0 to 180 °, so the sun is let
inside living places as wished.

Compact cassette system of
Wintent protects the fabric and
mechanism from the external
effects.

The shape of drop-arm can be
straight or curved. These arms
keep the fabric so tight due to
the strong springs integrated
inside them.

VOGUE

VOGUE sliding terrace awning larger outdoors...

Vogue is an aluminium structure integrated with sliding mechanism connected to the fabric to cover the large outdoors such as the terraces of restaurants, cafes or houses. Working principle of the system is that the front bar connected to the fabric on the awning, slides on the guide profiles.

Also fabric is tensed strongly by pistons mounted in the vertical guides of the structure to have smoother look.

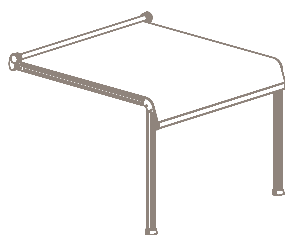

Lighting system integrated under the support bars makes the awning more aesthetic and gets your outdoors lighter.

Vogue with integrated lighting, with elegant looks and with top quality technology, is very close to perfection.

GLOSSY

GLOSSY sliding conservatory awning
cool summer days...

With Glossy conservatory awning, the sun shine reaches inside your conservatory as you wish and make coolness inside. With a sliding system parallel to the profile of the conservatory , Glossy is applied in the exterior. The sunshine is thus blocked from reaching the interior; it provides more coolness cooling in comparison with internal shading. This model awning is also applicable for pergolas.

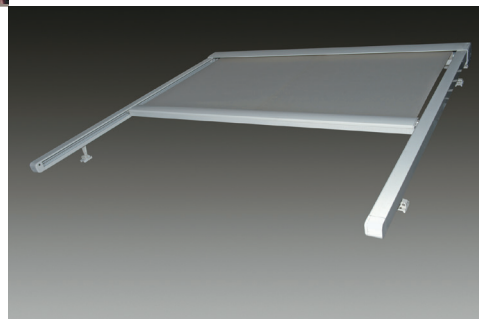

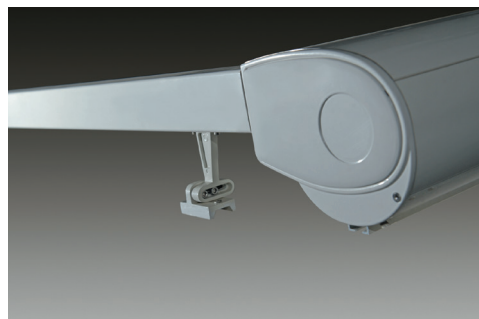

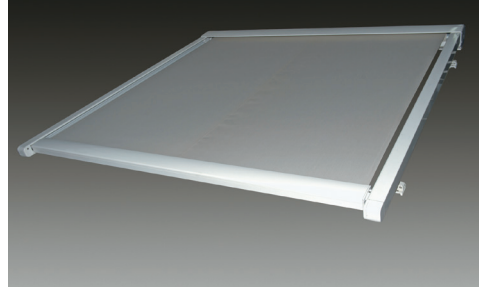

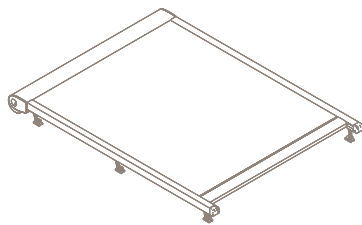

The logo for VerA, featuring a stylized 'V' symbol followed by the letters 'VerA' in a sans-serif font, all contained within a white square border.

SWING

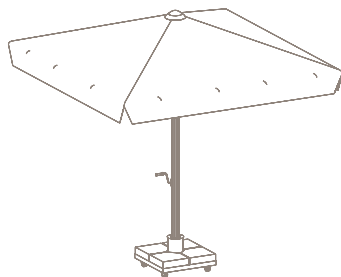

SWING mega umbrella
moveable shade...

Swing mega umbrella is most practical solution for large open air locations. Proportionate to the size of the area, the number of umbrellas can be increased or decreased. Some of the umbrellas may be opened while others shut to provide sunny or shady areas according to your preferences. Swing is the right solution for needs with its dimensions and square or circular shape. Four marble blocks, each one is 25 kg, at the foot of the umbrella provide additional safety on windy days. Optionally, you may utilize wheels to move the umbrella according to the angle of the sun instead of moving the location seated.

SOMFY

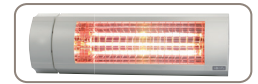

In all of our motorized awning systems we use SOMFY motors, which are the leader in its class. With a 5 year of warranty, our motors are the most silent ones on the market. The RTS Systems, which work with radio technology, do not require a cord between motorized awning and operation source. Only with one click on the remote control you can manage your awning as you sit or have it automatically open or close with a sun and wind sensor.

In cooperation with Somfy our company has acquired "POWERED BY SOMFY". The partnership of "Powered by Somfy" approves both quality and performance and evidences the undertaking of Albayrak and Somfy regarding the quality warranty. Besides, the "Powered by Somfy" warrants that the parts of high quality have been used in the product and that the product has been developed by most advanced technology. You can be assured that by choosing an awning with the "Powered by Somfy" logo you have made the correct choice; that means, you are about to purchase an awning with the utmost motor and automatic system of high quality.
